Hiring Manager  
Altis  
Lethbridge, Alberta

Dear Hiring Manager,

I am writing to express my interest in the entry-level software development position at **Daniola**. As a motivated IT professional with hands-on experience in programming languages such as C++, C#, Java, and JavaScript, I am eager to contribute to your development team. My education in Computer Information Technology, combined with personal projects has equipped me with strong problem-solving abilities and a solid foundation in software development. Below are some of the projects I have undertaken utilizing the programming technologies mentioned above;

- **Three Players 3x3 TicTacToe Game (Java):** Developed a multiplayer TicTacToe game using Java with a custom 3x3 grid. Implemented game logic to handle three players with dynamic win conditions and user input validation.
- **AgeTech Solutions Website (HTML/CSS):** Designed and built a responsive company website for a tech solutions firm. Utilized HTML and CSS to create a clean, user-friendly interface for showcasing services and client information.
- **Team Register Form (C# Windows Forms):** Created a team registration form application using C# with Windows Forms. Implemented form validation, data entry, and submission features, allowing users to easily register and manage team details.
- **Call Charge Calculator (C# Windows Forms):** Developed an interactive application to calculate phone call charges based on time, area code and rate using C#. Integrated user-friendly input forms and automated calculation processes.
- **File Data Organizer (Java Swing):** Built a Java Swing desktop application that organizes and categorizes file data into readable decimal places and columns.

In addition to my technical skills, I have demonstrated a keen attention to detail and strong communication abilities through various customer service roles and technical support experiences. Currently, I am furthering my skills through Cisco Network Technician certification while also holding several certifications in System Administration and JavaScript.

I am excited about the opportunity to contribute to **Daniola's** innovative projects and to continue growing as a software developer in a collaborative and dynamic environment. I would welcome the opportunity to discuss how my skills align with your team's needs.

Thank you for considering my application. I look forward to the possibility of contributing to your team and am available for an interview at your convenience.

Sincerely,  
Ebenezer Johnson
